Education

BIRLA INSTITUTE OF TECHNOLOGY AND SCIENCE

Master of Technology in Software Engineering

2024 - 2026

Pilani

Experience

SAP LABS

Software Development Engineer

Aug 2024 – Present

Bangalore, Karnataka

- Owned backend feature development, building scalable REST APIs (NestJS/Spring Boot) in a microservices architecture and contributing to the architectural refactoring of a core service from Onion to Hexagonal architecture to improve modularity and maintainability.
- Improved production stability by resolving SLA-critical incidents and strengthening observability, security compliance, and overall platform reliability.
- Led migration and rollout of a Playwright-based API automation framework, enabling automated PR and Jira ticket workflows and improving regression reliability across backend services.
- Owned end-to-end defect resolution across React, Spring Boot, and UI5, improved code quality at scale, and supported Java 17→21 upgrade for enhanced stability and scalability.

HYREO TECHNOLOGY SOLUTIONS

Software Engineering Intern

May 2023 - June 2023

Trivandrum, Kerala

- Worked as a full-stack developer, contributing extensively to the development, enhancement, and maintenance of the company's live website.

SKILL ORIENTATION CENTRE FOR ENGINEERING (SOCE) CUSAT

CORE GROUP

Aug 2022 – Feb 2024

College

- Served as a Student Mentor, organizing and leading technical workshops and related activities to support peer learning and engagement.

Hackathon

HACKLOOP23

- Selected as part of the top 5 teams out of 20 teams
- Developed a web application called zostelXai, designed to help students find their ideal hostels. Also implemented various AI/ML projects including a chat bot, real time object detection, text to image, and text to sign language features.

Projects

SMARTCERT | JAVA - Spring Boot, Apache Kafka, React, PostgreSQL, Docker, Kubernetes, Argo CD

- Designed and deployed a cloud-native Student Certificate Management System using Spring Boot, Kafka, PostgreSQL, Docker, Kubernetes, and Argo CD (GitOps).
- Implemented a secure, scalable microservices ecosystem leveraging API Gateway, Eureka service discovery, Saga orchestration, and Kafka-driven async workflows, supporting resilient and horizontally scalable Kubernetes deployments.

VOICE BASED EMAIL SYSTEM | Python - Django

- Contributed to the development of a Voice-Based Email System designed to improve email accessibility and communication for visually impaired users.

RUBBER DUCKY | Arduino UNO, Embedded C/C++, HID Keyboard Library, Ducky Script,

- Designed a macro keyboard which can automate HID keystroke injection.

Technical Skills

Languages: Java, Python, Javascript, Typescript

Backend: Spring Boot, Nest JS, Microservices Architecture, REST APIs, Authentication

Cloud & DevOps: Docker, Kubernetes, Argo CD (GitOps), CI/CD Pipelines

Tools: Git, Postman, Playwright, Dynatrace, Kibana, BlackDuck
